Re: Medical Center at Bowling Green – Cardiac Cath Lab Expansion

Mr. Meiners,

More oft than not in this business the only times we correspond are to address problems. I wanted to take a moment and drop you a note expressing my gratitude to your company. It has been a pleasure dealing with Bob Winstead on this project. He has been very helpful and easy to work with.

I also want to compliment AJ Vincent on his craftsmanship. He obviously takes great pride in his work, and his product in the field shows. He is meticulous in his conduit runs, panel feeds, and all around workmanship. AJ has shown very receptive to working the off hours that are required for hospital construction. He has maintained the schedule and in fact stayed ahead.

Thanks again for your assistance in this project. I will continue to solicit bids from Meiners Electric in the future.

Sincerely,

T. Sean Wooldridge
Project Manager
