

Energized Electrical Work Permit

Work Request (To be completed by the person(s) requesting the work.)				
Work site location:		Work order/p	project no.:	
Planned start date/time:		Planned end	date/time:	
Description of the work to be performed:				
Equipment requested to be shut down:				
(specify how long)	Lindi wark is semalate. Temperarily while benders are being			
	Until work is complete Temporarily, while barriers are being placed			
Requested by:	Signature: Title:			Date:
Trequested by:				Date.
Hazard Analysis (To be completed by the electrically qualified persons doing the work.)				
Shock Analysis/Approach Boundaries:	(from Table 130.2(C))			
Limited approach boundary	ftin			
Restricted approach boundary	ftin Work will be conducted within this boundary.			
Prohibited approach boundary	ftin Work will be conducted within this boundary.			
Results of the flash hazard analysis:	The flash protection boundary is <u>4 ft 0 in</u> for systems that are 600 volts or less based on the product of clearing times of 6 cycles (0.1 second) and the available bolted fault current of 50 kA or any combination not exceeding 300 kA cycles (500 ampere seconds).Calculation results:ftin			
Hazard/risk category for the task:	0 1 2 3 4 (from Table 130.7(C)(9)(A) & (11))			
Means employed to restrict the access of unqualified persons from the work area:	Signs/tags Barricades Attendants			
Has a documented job briefing with detailed procedures been conducted?	Yes, see attached No			
Do you agree that the work described above can be done safely?	Electrically Qualified Person(s) Date			
Justification for the live work request:	Shut down creates an increased/additional hazard (specify) Shut down is infeasible due to design or operational limitations (specify):			
The next available date for shutdown is:				
The next available date for shutdown is:				
Request for energized electrical work:	Electrical qualified p	erson:	Date:	
Proposed Energized Electrical Work Review (To be completed by Client Management.)
