## WHAT DO YOU KNOW ABOUT SAFETY?

## Ready to test your back safety skills? Answer the following questions by circling "T" for true or "F" for false to determine your level of back safety savvy.

| Workplace Injury | T<br>T | F | Employees suffer from back-pain more than any other affliction.      |
|------------------|--------|---|--|
|                  | Т      | F | Back pain is the top reason employees miss work.                     |
|                  | Т      | F | The leading cause of disability among adults is back problems.       |
|                  | Т      | F | Back injuries don't cost as much to treat as other injuries.         |
| Personal Risk    | т      | F | There are warning signs for "back attacks."                          |
|                  | Т      | F | Pain is good for you - it builds strength and character.             |
|                  | т      | F | If you haven't had problems before, you're not at risk.              |
|                  | т      | F | Back pain is an inevitable part of aging.                            |
|                  | т      | F | Back pain is common – it doesn't mean you're seriously injured.      |
|                  | т      | F | Increasing pain is a sign that your illness is getting worse.        |
|                  | т      | F | Men should not lift more than 37 pounds.                             |
|                  | т      | F | Women should not lift more than 28 pounds.                           |
| Ergonomics       | т      | F | Always carry loads close to your upper body.                         |
|                  | т      | F | Use the same techniques to pick-up and set-down heavy loads.         |
|                  | т      | F | Reaching outward relieves stress on your lower back.                 |
|                  | т      | F | Always lift with your legs.  |
|                  | т      | F | How I work at home can also affect my back.                          |
|                  | т      | F | It's better to lift a heavy object by yourself than to ask for help. |
|                  | т      | F | It's best to bend at the waist when lifting.                         |
|                  | т      | F | Squatting to pick up items is bad for your back.                     |
|                  | т      | F | There is no right way to lift.                                       |
|                  | т      | F | It's best to turn at the waist instead of twisting the entire body.  |
| Back Belts       | т      | F | Back belts can cause muscle weakness if worn too tight.              |
|                  | т      | F | Back belts provide support to the back.                              |
|                  | т      | F | Back belts make you stronger.  |
|                  | т      | F | People in good shape are at a lesser risk for back problems.         |

## Answer Key: Back Safety

| Workplace Injury | т      |   | Employees suffer from back-pain more than any other affliction.                                    |
|------------------|--------|---|--|
|                  | т      |   | Back pain is the top reason employees miss work.   |
|                  | т      |   | The leading cause of disability among adults is back problems.                                     |
|                  |        | F | Back injuries don't cost as much to treat as other injuries.                                       |
| Personal Risk    | т      | _ | There are warning signs for "back attacks."  |
|                  |        | F | Pain is good for you - it builds strength and character.   |
|                  |        | F | If you haven't had problems before, you're not at risk.  |
|                  |        | F | Back pain is an inevitable part of aging.  |
|                  |        | F | Back pain is common – it doesn't mean you're seriously injured.                                    |
|                  |        | F | Increasing pain is a sign that your illness is getting worse.                                      |
|                  | т      |   | Men should not lift more than 37 pounds.   |
